### **eTelemetry Solution Now Rated “Avaya Compliant”**

- *Locate911-A is compatible with key Avaya VoIP solutions*
- *Helps businesses automatically track VoIP phones on their network*

FOR IMMEDIATE RELEASE: May 28, 2008

Annapolis, MD — eTelemetry, a leader in extracting business information from network activity, today announced that its Locate911-A is compliant with key Internet protocol (IP) solutions from Avaya, a leading global provider of business communications applications, systems and services.

Locate911-A helps businesses track Voice over IP (VoIP) phone assets in real time and historically to reduce loss, improve data accuracy, and save staff time by automating VoIP assignment and e911 compliance tasks. The application now is compliance-tested by Avaya for compatibility with: Avaya Communication Manager release 5.0 and Avaya Application Enablement Services v4.1.

“Avaya compliance reflects eTelemetry’s commitment to providing standards-based technology to our customers and enables us to become a preferred e911 solution for Avaya partners and customers,” said Ermis Sfakiyanudis, president and CEO of eTelemetry.

eTelemetry is a member of the Avaya DevConnect program—an initiative to develop, market and sell innovative third-party products that interoperate with Avaya technology and extend the value of a company’s investment in its network.

As a Gold member of the program, eTelemetry is eligible to submit products for compatibility testing by the Avaya Solution Interoperability and Test Lab in Lincroft, N.J. There a team of Avaya engineers develops a comprehensive test plan for each application to verify whether it is Avaya compliant. Doing so ensures businesses can confidently add best-in-class capabilities to their network without having to replace their

existing infrastructure—speeding deployment of new applications and reducing both network complexity and implementation costs.

“By offering compliance testing to the many innovative companies like eTelemetry who are members of our DevConnect program, Avaya promotes fully interoperable solutions that help businesses unleash powerful new possibilities,” said Eric Rossman, vice president, developer relations and technical alliances, Avaya. “They are able to use Intelligent Communications to connect employees and customers to information from wherever they are, over whatever device they have available – getting more out of their multivendor network and delivering new value to their bottom line.”

### **About Avaya**

Avaya delivers Intelligent Communications solutions that help companies transform their businesses to achieve marketplace advantage. More than 1 million businesses worldwide, including more than 90 percent of the FORTUNE 500®, use Avaya solutions for IP Telephony, Unified Communications, Contact Centers and Communications-Enabled Business Processes. Avaya Global Services provides comprehensive service and support for companies, small to large. For more information visit the Avaya Web site: <http://www.avaya.com>.
