## **ConneXon and eTelemetry Announce Packaged VoIP Asset Tracking and e911 Compliant Solution**

*911 Enable and Locate911 together provide a fully automated, low-cost solution for VoIP installations regardless of network configuration*

**Montreal, QC, March 20, 2007** – 911 Enable, a division of ConneXon Telecom Inc., has established a strategic partnership with eTelemetry, Inc., to provide a total asset tracking and e911 compliant solution for VoIP phone installations.

911 Enable is a nationally recognized 9-1-1 service provider that offers award winning solutions interconnecting IP phones with the existing emergency service network. 911 Enable delivers coverage in both the US and Canada with solutions that are FCC, CRTC and NENA compliant.

eTelemetry's Locate911 is a plug-and-play IP automated phone tracking system. Locate911 dynamically matches each IP phone to the network switch port it is plugged into as well as its user's name pulled from the corporate staff directory. The location of the phone is automatically updated when the phone is moved on the network, a key capability for 911 emergency service.

“Locate911 and 911 Enable are a perfect match. Together we can offer a total e911 compliant solution that is easy to deploy and substantially less expensive than other e911 solutions,” says eTelemetry CEO Ermis Sfakianudis.

The combined solution will be sold by both 911 Enable and eTelemetry, as well as by their reseller partners.

See a demo of Locate911 March 20-22, 2007 at Spring VON, San Jose Convention Center, at 911 Enable booth #1327 and FOSE, Washington Convention Center, at eTelemetry booth #229

### ***About 911 Enable***

911 Enable, a division of ConneXon Telecom, is a nationally recognized 911 service provider that offers award winning solutions for businesses, large enterprises, and service providers. 911 Enable has demonstrated to be highly compatible with a range of softswitches, VoIP gateways, legacy PBX and IP-PBX phone systems, allowing for a 911 solution that scales from the smallest business to the largest Fortune 500 companies. 911 Enable is FCC and CRTC compliant and offers 100 per cent coverage in the U.S. and Canada.
